Universal tyre changer, completely automatic, equipped with two-speed motors -te one for the self-centering chuck and the other for the hydraulic system- which allow quick mounting and demounting of wheels of trucks, tractors, farm and earth-moving machines.

It operates on whole rims, groove or split ring rims, with tube or tubeless. Its working is electro-hydraulic and all controls are included in a functional control columnshaped mobile unit allowing the operator to place it in the most convenient position. Hydraulic self-centering chuck allows the optimum and extremely safe locking of wheels from 14" to 56".

A complete range of accessories enables the solution of even more difficult operative problems.
