

ProAlign Release Notes

Release Version: 1.10.0.134

Release Date: 05/17/10

Added Features from 1.9.0.107:

- 2010 specifications released.
- Support for DSP706/708 sensors
- Twin Steer Parallelism

Added Features from 1.8.0.105:

- 2009 specifications released.
- DSP504 sensor software updated to V1.9.

Added Features from 1.7.0.98:

- A new measurement display screen can now be accessed from the 'Show Vehicle' softkey. This new screen only applies to light vehicles. The tires in the display turn red, green, or gray depending on the in-specification /out-of- specification condition of the associated measurements. If any measurements for a wheel are out of specification, the tire (like the measurement) is red. If no measurements are out-of-spec and at least one measurement is in-spec, the tire is green. If no measurements for a wheel are either not measured or have no specification, the tire is gray.

Added Features from 1.6.0.87:

- Added the ability to raise and lower cameras on the WinToe® and during sensor compensation.
- Added 20° steering procedures. (Caster, TOOTs, IA and SAI).

Added Features from 1.5.0.81:

- Support for HawkEye Sensors, HS200 Series.
- Custom print logo image can now be included on printouts if it is available at the root of the USB flash drive.
- Added 125-403-1, 125-404-1, 125-411-1, and 125-412-1 camera support.
- Mandatory fields for Work Management.
- Updated images.
- Plan View added to Raise / Lower Camera screen.
- Specification recall is sticky to the second level of softkeys.
- Setup question added to allow or prevent work order deletion from within the program.
- Print Vehicle added for US database only.

Added Features from 1.4.0.59:

- Support for HawkEye Sensors, HS400 Series.
- Custom logo image can now be loaded from the USB drive, if present.

Added Features from 1.3.1.70:

- Specification recall now uses multi-tier.
- Rear individual toe tolerance added to appropriate vehicles.
- Camber/caster spec tables now can be displayed for appropriate vehicles.
- Sprinter ride height is now supported.
- An optional reminder to save the Before Measurements has been added.
- Print queuing (multiple printouts can now be queued).
